

# GRANITE

WAREHOUSE MANAGEMENT SYSTEM

Enabling best practices for your warehouse processes

**Accuracy - Efficiency - Integrity**

---

# Introduction

GraniteWMS is a simple and inexpensive Warehouse Management System designed with the needs of the small to mid-level warehouse in mind.

It is easy to use and provides efficient and accurate warehouse management.

GraniteWMS allows for full traceability, granularity, and visibility of your stock.

**Stocktake**

# Key Functionality in GraniteWMS

# With **GraniteWMS** every process in your warehouse is mapped to a process flow driven by **barcode** scanning

- Identify the item
- Identify the location
- Track each user on the scanner
- Group items by code, location, tracking barcode, serial number or batches
- Record every transaction
- Communicate with your GraniteWMS Database
- Report using the GraniteWMS Desktop application

# GraniteWMS is a leader in mid-market business warehousing software

Our solution can stand alone or be integrated into Sage 300, Sage 200 Evolution, or SAP Business One.
